BM

BENDING

ONE STEP FORWARD IN BENDING

DANOBAT has launched its new BM panel bender, designed to satisfy the most demanding market needs. With a more innovative design, this is the result of years of DANOBAT's own know-how in the field of bending.

FULL FLEXIBILITY, MAXIMUM PRODUCTIVITY

The BM panel bender is equipped with an **automatic bending length setting** system, which adapts to the dimensions of the part to be bent, making it possible to manufacture different consecutive sizes without any manual adjustments. This device **reduces machine downtimes**, while **ensures user safety** and eliminates possible human error.

Furthermore, because of the part automatic handling system and the bending concept, **cycle times are reduced to a minimum**, making this machine the ideal solution for manufacturing large volumes, either for short or long series.

UNLIMITED BENDING

Its **universal tool**, along with the possibility of adding **customised auxiliary tools**, makes the BM machine the all-in-one **highly versatile solution**, allowing the manufacturing of a wide range of special bendings, such as tubes, tight radii, curves, safe edges, etc.

Achieving this type of bending standards brings **added value** to the final part.

The BM bending machine has been designed with a modular concept, so that it may incorporate a large range of accessories and offer fully automated solutions.

CUSTOMISED SOLUTIONS, MULTIPLE APPLICATIONS

▲ Electrical cabinets

▲ Metallic doors

▲ Lifts

▲ Light fixtures

▲ HVAC

▲ Metallic furniture

DANOBAT SHEET METAL TECHNOLOGIES

- ▶ PUNCHING
- ▶ LASER
- ▶ PUNCHING + SHEARING
- ▶ PUNCHING + LASER
- ▶ BENDING

SERVICE

We are with the customer throughout the machine life.

Immediate telephone response.

Local service assistance in each country.

Personal treatment.

Teleservice from factory.

Fast assistance, 24 hours.

Stock of parts in all countries.
